

Naveen Jindal School of Management

Master of Science in Supply Chain Management

36 semester credit hours minimum

Faculty

Professors: Alain Bensoussan, Metin Çakanyildirim, Dorothee Honhon, Bin Hu, Ganesh Janakiraman, Elena Katok, Özalp Özer, Suresh P. Sethi, Kathryn E. Stecke

Associate Professor: Anyan Qi, Serdar Simsek, Guihua Wang, Shouqiang Wang, Yining Wang

Assistant Professors: Maya Balakrishnan, Mingliu Chen, Soraya Fatehi, Andrew Frazelle, Neda Miraeian, Jimmy Qin, Ignacio Rios Uribe, Ashwin Venkataraman, Mengxin Wang

Clinical Professors: Sonia Leach, Divakar Rajamani, Kannan Ramanathan

Clinical Associate Professors: Avanti P. Sethi, Ramesh Subramoniam, Aysegul Toptal, David Widdifield

Professor of Instruction: Shawn Alborz

Associate Professors of Instruction: Khatereh

protected by reCAPTCHA

Ahadi, Monica E. Brussolo, Negin Enayaty Ahangar,
Sarmann Kennedyd, Mohammad Naseri Taheri,
Tristan Whalen

Assistant Professors of Instruction: Hien Thu
Nguyen, Rasoul Ramezani

Professors of Practice: David Parks, Ramesh
Subramoniam

Admission Requirements

In addition to the University's [general admission requirements](#), applicants are required to submit the following materials as part of their application file for holistic admission consideration:

- One letter of recommendation.
- A statement of purpose/essay.
- A resume.

While not required, applicants can also submit the following items to be considered:

- GRE/GMAT scores.

Deadline: Please take note of [application deadlines](#). All applications completed by the deadline will be reviewed for admission. Applications submitted or completed after the deadline may be reviewed for admission only if spaces remain within the upcoming cohort and will be reviewed in order by the date the application file became complete.

Degree Requirements

The Master of Science in Supply Chain Management (MS SCM) is a minimum 36 semester credit hours STEM (Science, Technology, Engineering and Mathematics) degree program that

explores the key issues associated with the design and management of industrial supply chains, including methods for improving supply chain operations by lowering costs and improving quality. The depth of the program uniquely prepares students to be the next generation of business leaders with skills and competencies necessary to perform across functions within an organization. Students gain business management knowledge and analytical decision-making skills (especially for complex systems) along with real-life experiences through industry projects.

To apply for this degree program, an undergraduate degree is required (all majors are considered). Students must maintain a 3.0 grade-point average (GPA) in both core courses and in all graduate courses taken in the degree program, excluding program prerequisites to qualify for the MS degree.

Prerequisites

Students pursuing the Master of Science in Supply Chain Management degree program are required to complete one semester credit hour of [MAS 6102](#) Professional Development course (except executive education students). In addition, knowledge of calculus is required and students who have not completed an undergraduate calculus course may satisfy the prerequisite by completing [OPRE 6303](#) Quantitative Foundations of Business. Degree credit is not earned for program prerequisites, however, the grade achieved in prerequisites will count toward the student's grade-point average (GPA). All program prerequisites must be satisfied within the first semester of graduate study as a degree-seeking student.

Course Requirements

Core Courses: 18 semester credit hours

[OPRE 6301](#) Statistics and Data Analysis

or [OPRE 6359](#) Advanced Statistics for Data Science

[OPRE 6302](#) Operations Management

[OPRE 6366](#) Global Supply Chain Management

[OPRE 6370](#) Global Logistics and Transportation

[OPRE 6371](#) Purchasing, Sourcing and Contract Management

And choose one course from the following courses:

[ACCT 6301](#) Financial Accounting

[ACCT 6305](#) Accounting for Managers

[FIN 6301](#) Financial Management¹

Elective Courses: 18 semester credit hours

Students may choose any master's level course with the OPRE prefix, excluding OPRE core courses, or any course listed below. As part of the 18 semester credit hours of elective courses, students may substitute up to six semester credit hours of master's-level courses from any unrestricted course/prefix or catalog year offered within JSOM.

[OPRE 6009](#) Supply Chain Management Internship² (required elective)

[OPRE 6304](#) Analytics for Innovation in Demand and Supply Management

[OPRE 6305](#) Business Analytics with R

[OPRE 6322](#) SAP Cloud Analytics

[OPRE 6324](#) Internet of Things

[OPRE 6325](#) Healthcare Operations
Management

[OPRE 6332](#) Spreadsheet Modeling and
Analytics

[OPRE 6333](#) IT and AI Strategy and Innovation

[OPRE 6335](#) Risk and Decision Analysis

[OPRE 6340](#) Flexible Manufacturing Strategies

[OPRE 6341](#) Retail Operations

[OPRE 6343](#) Applied Machine Learning

[OPRE 6352](#) Intelligent Enterprise Systems
Configurations and Implementation with SAP

[OPRE 6354](#) Quality Improvement in
Healthcare: Six Sigma and Beyond

[OPRE 6355](#) Deal Making Strategies

[OPRE 6362](#) Project Management in
Engineering and Operations

[OPRE 6364](#) Lean Six Sigma

[OPRE 6367](#) Capstone Projects in Supply Chain
Management

[OPRE 6369](#) Supply Chain Software with SAP:
Planning, AI, and Blockchain Innovations

[OPRE 6378](#) Supply Chain Strategy and AI-
Enabled Processes

[OPRE 6379](#) Product Lifecycle Management

[OPRE 6382](#) Supply Chain Trade Compliance

[OPRE 6383](#) Advanced AI in Supply Chain

Management

[OPRE 6389](#) Managing Energy and
Environment: Risk, Investment, Technology
(MERIT)

[OPRE 6390](#) Enterprise Resource Planning with
SAP

[OPRE 6393](#) Database Foundations

[OPRE 6394](#) Technology and New Product
Development

[OPRE 6398](#) Prescriptive Analytics

[OPRE 6399](#) Business Analytics with SAS

[OPRE 6V90](#) Individual Study in Operations
Management

[OPRE 6V98](#) Supply Chain Management
Internship

[OPRE 6V99](#) Special Topics in Operations
Research

Supply Chain Management Concentrations

The MS SCM degree program offers students opportunities to choose a concentration (optional) to obtain an in-depth knowledge in a specific business area depending on their interests.

Analytics Concentration: 9 semester credit hours

The Analytics track is recommended for students interested in managing and analyzing large-scale data and developing organizational strategies.

Select 9 semester credit hours from the

courses below.

[OPRE 6304](#) Analytics for Innovation in
Demand and Supply Management

[OPRE 6305](#) Business Analytics with R

[OPRE 6332](#) Spreadsheet Modeling and
Analytics

[OPRE 6393](#) Database Foundations

[OPRE 6398](#) Prescriptive Analytics

Technology and Artificial Intelligence Concentration: 9 semester credit hours

The Technology and Artificial Intelligence concentration is recommended for students interested in developing skills to use cutting-edge technology and AI effectively in supply chain. Select 9 semester credit hours from the courses below.

[OPRE 6322](#) SAP Cloud Analytics

[OPRE 6324](#) Internet of Things

[OPRE 6369](#) Supply Chain Software with SAP:
Planning, AI, and Blockchain Innovations

[OPRE 6383](#) Advanced AI in Supply Chain
Management

[OPRE 6394](#) Technology and New Product
Development

Continuous Improvement Concentration: 9 semester credit hours

The Continuous Improvement concentration is recommended for students interested in understanding efficient operations and project scheduling.

Select 9 credit hours from the courses below.

[OPRE 6354](#) Quality Improvement in Healthcare: Six Sigma and Beyond

[OPRE 6362](#) Project Management in Engineering and Operations

[OPRE 6364](#) Lean Six Sigma

[OPRE 6379](#) Product Lifecycle Management

Risk and Strategy Concentration: 9 semester credit hours

The Risk and Strategy concentration is recommended for students interested in decision making in risky environments and business strategy.

Select 9 credit hours from the courses below

[OPRE 6333](#) IT and AI Strategy and Innovation

[OPRE 6335](#) Risk and Decision Analysis

[OPRE 6378](#) Supply Chain Strategy and AI-Enabled Processes

[OPRE 6382](#) Supply Chain Trade Compliance

[OPRE 6389](#) Managing Energy and Environment: Risk, Investment, Technology (MERIT)

1. Students may be approved to take FIN 6301 without the prerequisites if they have a strong undergraduate background in accounting, pending the MS Finance program approval.

2. Students may use OPRE 6009 only for their first internship and any additional internship must be completed as OPRE 6V98 (3 semester credit hours maximum). Students may use OPRE 6V98 or OPRE 6367 to fulfill the internship requirement. Students are no

longer eligible to enroll in OPRE 6009 if they have already completed OPRE 6V98 or OPRE 6367.

Graduate Certificates

Graduate Certificate in Procurement in Supply Chain Management

9 semester credit hours

Faculty

Professors: Alain Bensoussan, Metín Çakanyildirim, Dorothee Honhon, Bin Hu, Ganesh Janakiraman, Elena Katok, Özalp Özer, Suresh P. Sethi, Kathryn E. Stecke

Associate Professor: Anyan Qi, Serdar Simsek, Guihua Wang, Shouqiang Wang, Yining Wang

Assistant Professors: Maya Balakrishnan, Mingliu Chen, Soraya Fatehi, Andrew Frazelle, Neda Miraeian, Jimmy Qin, Ignacio Rios Uribe, Ashwin Venkataraman, Mengxin Wang

Clinical Professors: Sonia Leach, Divakar Rajamani, Kannan Ramanathan

Clinical Associate Professors: Avanti P. Sethi, Ramesh Subramoniam, Aysegul Toptal, David Widdifield

Professor of Instruction: Shawn Alborz

Associate Professors of Instruction: Khatereh Ahadi, Monica E. Brussolo, Negin Enayaty Ahangar, Sarman Kennedy, Mohammad Naseri Taheri, Tristan Whalen

Assistant Professors of Instruction: Hien Thu Nguyen, Rasoul Ramezani

Professors of Practice: David Parks, Ramesh Subramoniam

Overview

The Graduate Certificate in Procurement in Supply Chain Management is designed to enrich existing course curricula by providing conceptual and experiential specialization training to students which can be applied to the business environment upon certificate completion. Individuals in the certificate program will receive course content designed to promote a deeper understanding of operations and responsibilities of procurement in small to large sized companies. The training provides students with in-depth procurement knowledge utilizing a combination of learning methods which include:

1. In-depth procurement knowledge utilizing a combination of learning which include analytical assignments
2. Business-related and in-class project management assignments
3. Case study analyses
4. And critical content discussions or lectures provided in a synergistic, integrated manner where conceptual and practical knowledge application in the workplace is demonstrated across multiple contexts.

Upon completion of the certificate program, students will be well equipped and qualified to lead procurement operations and participate in the development

of procurement strategy necessary for companies to succeed in today's challenging marketplace.

Admission Requirements

In addition to the University's [general admission requirements](#), applicants are required to submit the following materials as part of their application file for holistic admission consideration:

- One letter of recommendation.
- A statement of purpose/essay.
- A resume.

While not required, applicants can also submit the following items to be considered:

- GRE/GMAT scores.

Deadline: Please take note of [application deadlines](#). All applications completed by the deadline will be reviewed for admission. Applications submitted or completed after the deadline may be reviewed for admission only if spaces remain within the upcoming cohort and will be reviewed in order by the date the application file became complete.

Course Requirements

Required courses: 9 semester credit hours
